

Combination Edelman Auger

Edelman auger Combination type, specially designed for use in both sandy and clayey soils. Available as one-piece auger or bottom part with various diameters and connections.

The combination type auger gets a reasonably good hold of sandy material, while clayey material can be easily removed from the auger body. The best of both (or more) worlds!

Augers should be left to air-dry after use and decontaminated with soaps. Rust will naturally appear on these augers, read the brochure for more information.

Key Features

- High tensile strength forged auger bodies
