

The Mini current meter is a professional tool with an aluminium propeller. This small device is used in small ditches, with a low water level. It has a measuring range 0.03 to 2.5 m/sec and is very accurate. The instrument is included in a comprehensive set.

Key Features

- Professional tool for sensitive measurements, also in slow running water
- Very high accuracy, thanks to extremely low friction
- Measuring range: 0.03 to 2.5 m/sec
- Small diameter current meter for use in shallow waters, irrigation canals etc.
- Propeller covers most velocities

Applications

- Irrigation research
- Water quantity research
- Monitoring water quantity
- Discharge measurements

Set contains

- Digital counter (Z6 basic version)
- 1.5 metre extension rods with dm-graduation
- 4 metre cable
- Case
- Oils and tools
