

The stone catcher can be used to remove loose stones from the auger hole.

When drilling a hole with a hand auger, loose stones can appear or fall into the auger hole. This stone catcher was designed to remove these, so that the drilling process can be resumed without damage to the auger or to create a free hole to install a monitoring well pipe.

Key Features

- High tensile strength forged auger bodies
- Perfect auger body shapes for optimal drilling
- Nontoxic steel for all types of analyses
- Rapid connectible extension rods

Variations

Bayonet connection -

- Diameter 7 cm
- Diameter 10 cm

Conical screw thread connection -

- Diameter 7 cm

Specification

Connection types	Bayonet, conical screw thread
Product material	Iron, other
