

This self-priming centrifugal pump is used primarily for (fast) purging or emptying of monitoring wells and bore holes. Other applications are pumping water for irrigation, drinking water for cattle, and more.

The pump has a quiet, reliable, and economical four stroke engine running on ordinary or unleaded petrol. The pump is not sensitive to polluted water, and the maintenance is minimal and easily executed.

Key Features

- Up to a depth of 7 metres
- Minimal maintenance
- Easily executed

Applications

- Infiltration research
- Irrigation research
- Sludge sampling
- Water sampling

Specification

Fit for silt laden water	Yes
Maximum pumping capacity	30 l/min
Maximum sample depth	7 m
Power supply	Battery
Sample diameter	10 mm
